- 1 Until 2022, including "Energy and climate fund"; as of 2023, including "Climate and transformation fund". Possible deviations from earlier publications due to subsequent changes in the allocation to R&D or subsequent changes in the allocation to the types of funding are possible. Possible rounding differences.
- 2 Target expenditure 2024 including "Climate and transformation fund" but excluding other funds from section 60 "General financial management" chapter 6002 "General appropriations". These are collected retrospectively.
- 3 Including expenditure on orders for departmental and defence research and development. Excluding basic funding of federal institutions with research and development tasks.
- 4 Excluding tax measures (grants, special depreciations).
- 5 Including Land-owned institutions with research and development tasks that are jointly funded by the federal and Länder governments.
- 6 Including universities of the federal armed forces and the Federal University of Applied Administrative Sciences.
- 7 Located in Germany and abroad.
- 8 ACTUAL figures are needed to break down the BMBF's global reduced expenditure by types of funding.
- 9 The departments' scopes of responsibilities and their names correspond to the organisational division of the 20th legislative period's Federal Government. To ensure comparability between individual years, expenditures were retrospectively adjusted or implemented to reflect the current organizational division when there were changes in the allocation of responsibilities between government departments.

Last update: November 21, 2024

This table also appears in the Federal Report on Research and Innovation as Table 7.
