1 First enrolment. Data are not identical to the number of total first-year students at higher education institutions in table 1.9.6. In 2005, demarcation pursuant to ISCED 1997 level 5A; as of 2019, demarcation pursuant to ISCED 2011 level 6 sub-category 645 and level 7 sub-category 746. In 2005, ISCED 645 excluding vocational academies.

2 Net rates according to the OECD calculation method (Therefore the number of first-time entrants of that age is divided by the total population of the corresponding age. These age-specific entry rates are added up to net entry rates.).
3 Allocation of study areas to subject groups pursuant to the subject classification of the higher education statistics version 2015. For comparative purposes the results were calculated back to 2005.
